The following racehorses died or required euthanasia while racing or training on American tracks in 2014. Please note, however, that these are on-site deaths only – the “catastrophically injured” who were euthanized back at the farm or at a rescue facility are *not* reflected here. In addition, several states – California and Kentucky among them – rejected my FOIA request. While some horses from these states do appear below (confirmed through other channels), a likely majority remain hidden. Other states, still, omitted training deaths from their FOIA documents. So, this list – roughly 1,000 strong – could easily and reasonably be doubled, leaving us with close to 2,000 track-related kills last year.

Furthermore, what the industry refers to as “non-racing” fatalities – colic, laminitis, “found dead in stall” – have not been included. And, of course, this list says nothing of the *thousands* of recent “athletes” who were bled-out and butchered in slaughterhouses. In short, what follows is far from a complete reckoning of Racing’s carnage.

Finally, while reading, please be mindful that the maiming and destruction is but a part of the story. There is, also: the pounding of unformed bodies; the extreme confinement of naturally free-roaming animals; the *whipping*; the (obviously) nonconsensual drugging and doping; and perhaps worst of all, the commodification – the buying and selling and trading and dumping. Collectively, the horseracing wrongs. –*Patrick Battuello*

Note: Every effort has been made to ensure the accuracy of this list. That said, my information is only as good as the information I receive. If it can be proved that a horse appears in error, I will dutifully remove.

Sources: FOIA documents, Equibase charts, NYS Gaming Commission database, CHRB Stewards Minutes, direct confirmations from track officials

## America's Dead Racehorses, 2014

AGE	NAME	DATE	TRACK	RACE
3-year-old	<b>Aunt Meanie</b>	January 1	Fair Grounds	9
